

Product Data Sheet

GCC 120

Paint Oven Cleaner

GCC 120 is a water based alkaline cleaner that is designed to remove baked on paint residue from the interior of ovens. Also very good on e-coat. Can be used as a general purpose cleaner in the paint shop as well. Can be diluted with water. Use with care when applying to soft metals such as aluminum.

PROPERTIES

- | | |
|--------------------------------|---------------------|
| 1. Appearance | Clear liquid |
| 2. Density @ 77 ⁰ F | ~1.036 g/cc typical |
| 3. pH | >13.0 neat |

APPLICATION

GCC 120 can be applied as supplied. It can be applied to the oven walls by spraying, brushing or wiping. GCC 120 is an alkaline product so care must be taken to ensure against attack on soft metals such as aluminum, magnesium or galvanized metals. When applying to these types of soft metals the contact time after soil removal should be kept to a minimum.

STORAGE AND HANDLING

Store GCC 120 in a dry location at room temperature. Avoid skin and eye contact. Wash thoroughly after handling. Avoid breathing vapor and use adequate ventilation. Please make sure that the proper PPE is used when applying GCC 120.
